

<b>UTC Project Information</b>	
<b>Project Title:</b> Livability Performance Measures to Transportation Plans and Projects	
<b>University</b>	University of Florida
<b>Principal Investigator</b>	Leigh Blackmon Lane
<b>PI Contact information</b>	918.513.3482 (ph) 919.515.8898 (fax) lblane@ncsu.edu
<b>Funding Source(s) and Amounts Provided (by each agency/organization)</b>	STRIDE: \$53,000 Match: \$53,000
<b>Total Project Cost</b>	\$106,000
<b>Agency ID or Contract Number</b>	2013-018S
<b>Start and End Dates</b>	August 19, 2013 to January 7, 2015
<b>Brief Description of Research Project</b>	
<p>This project leverages an existing FHWA tool to assist transportation agencies in developing performance measurement and management processes that support livable communities. To ensure context-sensitivity, each workshop will be tailored to the unique needs of the transportation agency, as well as the plan or project that will be the focus of the workshop. Generally, each workshop will contain the following components: an introduction to livability performance measures, a visioning exercise (if needed), facilitated use of the Community Vision Metrics tool, prioritization of selected performance measures, and an action-planning session. The project team will also use pre- and post-workshop surveys to evaluate the efficacy of the workshop in education the participants and providing technical assistance in using the tool. We will document all workshops in a "case study" format and develop a synthesis of results to guide livability-oriented performance measurement efforts at</p>	

<p>transportation agencies. The team will also use the results of the pre- and post-workshop surveys to improve workshop content over the course of the project.</p>	
<p>Describe Implementation of Research Outcomes (or why not implemented)</p>
